

GRINDMASTER Horizontal Stone Grinding Mill FM 950 I

**Meeting Your Needs for High Quality,
Healthy Wholemeal Flour, Grits or
High Class Flour**

HEALTHY FLOUR THROUGH OPTIMUM GRINDING

The GRINDMASTER stone mill professionally and simply does the job through the optimum milling process using proven and well-known mill stones in a sturdy design. The heavy duty mill aimed for industrial purposes has a heavy weight and heavy bearings, a heavy shaft and a strong frame. The adjustment of the stones has an adjustment gear for fine tuning.

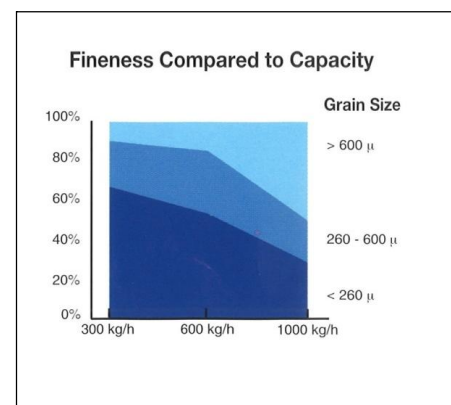

All in all an industrial mill used for grinding whole grain into grits/healthy and good whole meal flour or for grinding of flour grits into high class flour as the last break after a roller mill.

INDUSTRIAL / DECENTRALIZED STONE GRINDING MILLS

The superior thing about the GRINDMASTER stone mill when used in United Milling Systems' decentralized flour mills for milling high class flour at a high yield is that the process only uses 4 milling breaks. In this unique combination of 3 break roller milling and 1 break stone milling the stone mill produces a high quality, fine flour from the fine, white grits from the roller mill.

FLOUR READY FOR BAKING

The flour produced on a GRINDMASTER stone mill contains all the natural vitamins, minerals and ballast substances and can be used for baking without further processing. Furthermore, the stone ground flour has a larger surface increasing the ability to absorb liquid, giving an airy and elastic dough easy to work with.

Technical Data	GRINDMASTER FM 950 I	
Motor Power, kW	15	18.5
Grinding Mill RPM	300	
Dimensions		
Length, mm	1880	
Width, mm	1050	
Height, mm	1632	1260
Weight, kg	1250	
Performance		
Capacity, kg/H	300	1000
% Flour Grits below 260 my	70	28
% Flour Grits above 260 my	20	22
% Bran above 600 my	10	50
