

EUROPEMILL

HORIZONTAL STONE GRINDING MILLS (S-MODEL)

Range of Application: Maize, Millet, Wheat, Barley, Rice, Sorghum, Teff, Peas, Beans, Spices, Coffee, Sugar, Salt.

EUROPEMILL HORIZONTAL GRINDING MILL

The EUROPEMILL grinding mills are made of the best raw materials obtainable and equipped with the famous Engsko millstones.

Quality ball bearings on both sides of the shaft ensure a low power consumption. The handwheel regulates the grinding according to the degree of fineness required. The millstones are protected from damage by the safety spring if foreign matters should enter the mill.

Engsko millstone

Europemill Horizontal S

The disengaging lever separates the millstones without changing the adjustment. Useful for start and stop operation and for cleaning the mill from stones, metal etc.

Before leaving the factory each mill is carefully tested in our quality control department.
