

SIFTER MODEL BD 150

IDEAL COMPLETION TO YOUR STONE MILL

For sifting whole meal flour, our centrifugal pulsation sifter model BD-150 is an ideal completion to your stone mill as it ensures a high output with a very good quality. The sifter is driven by a single phase 230 v, 0,88 kW electric motor, which is directly coupled with the shaft. It works efficiently and simply, and its dimensions fit our stone mill EM 25/250. The easily and quickly exchange sieves allow three different selections: one type of flour, fine bran and bran.

The whole structure is in powder painted, welded steel. A rotor operating by centrifugal pulsations is set up on dust-proof ball bearings. The sifter is coupled with three separate discharge outlets to sack each different type of flour and each discharge spout is supplied with nozzles and leather lacers.

EM-25/250 with 60 Hz. UL/CSA approved motor
